PROFESSIONAL SUMMARY

Motivated Bachelor of Information Technology (Game Technology) undergraduate at Universiti Teknikal Malaysia Melaka (UTeM) with interests spanning game development, database systems, and information technology. Skilled in building full-stack systems, including a self-developed booking platform using PHP and MySQL, alongside experience integrating real-time biometric data streams and network protocols into interactive game applications. Combines a solid foundation in game development, database management, and backend programming with hands-on project experience across multiple technical domains. Seeking a Game Technology / Database / IT Internship in Johor, Kuala Lumpur, Selangor, or Melaka (willing to relocate) to apply and further develop these skills in a professional development environment and is available for placement from 28th September 2026 to 12th March 2027.

EDUCATION

Bachelor of Information Technology (Game Technology) with Honours

October 2023 - Present

Universiti Teknikal Malaysia Melaka (UTeM) | CGPA: 3.32

Relevant Coursework:

- Game Development
- Human-Computer Interaction
- Data Structures & Algorithms
- Computer Graphics

PROJECTS WORKED ON

Vault Runner: Midnight Heist (Final Year Project - PSM)

Indie Developer

- Designed and developed an innovative 3D action-stealth game in Unreal Engine 5, integrating consumer WearOS smartwatches through a custom low-latency UDP network socket listener for real-time biometric data streaming.
- Architected a dynamic biometric state machine driving "Zen" and "Panic" gameplay loops, translating the player's real-time heart rate into distinct behavioral states that directly influence core mechanics.
- Implemented adaptive guard AI perception profiles that scale detection range, alertness, and response aggression based on the player's live physiological state, creating a responsive stealth-horror experience.

Football Field Booking System (Workshop 1)

Solo Developer

- Designed and developed a full-stack web-based booking system enabling users to reserve football fields online, using PHP for server-side logic and MySQL for relational data management.
- Built a normalized database schema to handle field availability, time-slot scheduling, and booking records, preventing double-booking conflicts through backend validation logic.
- Implemented core CRUD functionality allowing users to create, view, update, and cancel bookings, alongside an admin interface for managing field listings and schedules.

Last Vanguard (Workshop 2)

3D Asset Artist & Co-Game Designer

- Co-designed a full-stack Action RPG in Unreal Engine featuring a real-time combat system, a central headquarters hub, and customizable six-slot player action loadouts.

- Created, optimized, and integrated 3D game assets, including stylized characters, environmental props for the Bureau headquarters, and visual effects (VFX) tailored for high-stakes chapter boss battles.
- Developed a strategic resource management loop utilizing structured main/side missions and dual type save points (Base and Field) to facilitate flexible player progression and grinding.
- Collaborated within a three-person development team using version control to seamlessly merge 3D art assets with core gameplay programming and custom GUI designs.

AWARDS & ACHIEVEMENTS

- Dean's List Award - Universiti Teknikal Malaysia Melaka (UTeM) | Semester 3&5
- 3rd Place, Football - Sukan Antara Fakulti, UTeM | 2024
- 2nd Place, Futsal - Sukan Antara Fakulti, UTeM | 2023

TECHNICAL SKILLS

Game Engines & Frameworks: Unity, Unreal Engine, Godot, GDevelop

3D Modeling & Digital Art: Blender, Adobe Photoshop, Canva

Video Production & Motion Graphics: Adobe After Effects, Adobe Premiere Pro, CapCut

Productivity Suites: Microsoft Excel, Microsoft PowerPoint

Advanced Tools: Artificial Intelligence Prompt Engineering & Integration Tools

WORK EXPERIENCES

Grab Rider

Grab Malaysia

September 2022 - Present

- Delivered food and parcel orders across Pasir Gudang, consistently meeting delivery time targets while navigating dynamic traffic and route-planning challenges.
- Maintained a high customer satisfaction rating by ensuring timely, accurate, and careful handling of orders.
- Managed time effectively to balance multiple deliveries per shift, demonstrating strong self-discipline and independent work ethic.

Waiter

Farhana Steamboat Corner

March 2021 – June 2021

- Provided attentive customer service in a fast-paced restaurant environment, handling orders, table service, and customer inquiries.
- Collaborated with kitchen and front-of-house staff to ensure smooth service flow during peak hours.
